WOOD BRIQUETTES

**Clean burning • Low emission • Sustainable
Wood burners • BBQ's • Pizza Ovens • Braziers**

What are Wood Briquettes?

- A fuel source made out of dried, compacted wood shavings, sourced locally from our factory in Lincoln, outside Christchurch.
- Hotter, cleaner, longer-burning and more economical than traditional firewood
- Composed of shavings and sawdust, briquettes turn waste into a fuel
- Saves storage and transportation expenses and is incredibly eco-friendly.
- Natural timber – so no binders or additives.
- Has a burning heat and calorific value similar to coal. But more importantly, this is a renewable source of energy which eliminates atmospheric pollutants found in fossil fuels and wet wood.
- A carbon-neutral fuel that is substantially more resource-friendly than coal.

The Benefits of Wood Briquettes:

Wood briquettes are quickly gaining a reputation as the fuel of choice for many people, and it's easy to see why ...

The benefits include:

- A cost-effective fuel for log burners, pizza ovens and braziers.
- Chimney and flue-friendly: the low moisture content reduces the risk of your chimney or flue becoming clogged compared to higher moisture fuels.
- Take up less storage space than traditional firewood.
- Easy to light and can provide a long-lasting fire.
- More environmentally friendly than fossil fuels as they are made from wood which would otherwise end up in landfill.
- Odourless and produce very little ash and smoke.
- A flexible form of fuel which can be used indoors, outdoors and in combination with firewood or coal.

Briquettes being manufactured in our Lincoln factory

How do I store Wood Briquettes?

Careful storage of wood briquettes is essential as exposure to any moisture will cause them to expand and will ruin their burning efficiency. Ideally, they should be stored indoors in as dry an environment as possible.

Usage: Add fire-starters to briquettes. To load the fire with briquettes, a metal bucket or coal skuttle makes loading the briquettes easier.

Please dispose of any remaining ash responsibly.

To order: Sold in paper sacks, approximately 15kg –16kg.

\$15 per bag , buy 10 get one free.

Produced at our Lincoln site, The Macro Factory. 653 Ellesmere Road, Lincoln.
